## **DETAILED ACTION**

### ***Specification***

1. The amendment filed 7/17/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the removal of the transmission media from the broader machine readable media has created a new matter issue by deletion.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 11-14, 18-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Based on the deletion of material in the specification regarding machine readable media, the claims have failed to meet the written description requirement because of the new matter issue discussed above.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 11-14, 18-20 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2116

5. Applicant can remedy the new matter issue by reinserting the transmission media into the specification and making paragraph 68 identical to that of the original specification. The machine readable media can then be split into two groups, one including tangible and statutory media (storage media including memory 750, magnetic storage 740) and the other including non-tangible media (transmission media including optical waves). The claims should be amended such that the media on which the instructions are stored includes only the first group of tangible media.
6. Applicant is also advised to cancel the non-elected claims to speed allowance of the application should the steps above be taken to remedy the new matter issues.

### *Conclusion*

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
